

CONNECTIVITY THROUGH MODERN CRAFTSMANSHIP

In a world where we have become so distant, there is a longing for a return to more connectivity with each other and with those behind what we buy. The Amity Home design team is inspired by traditional handi-crafts from around the globe and works with artisans to incorporate these traditional techniques in a modern way as design details in many of their collections.

From subtle hand stitched binding details on bedding inspired by traditional kantha quilts, to rustic linen throws dipped piece by piece for a bold pop of color; flat weave rugs woven with hand twisted jute fibers to linen curtain tops full of frayed pintucks. Each of these hand-crafted details not only add a layer of artisanal sophistication to any design project, but they remind us of the community of craftsmen who had a hand in inspiring and making each piece.
