

## SERENITY NOW

Cool hues have long been used in design to add a sense of calm, whether that is to a building, room or wardrobe. Analogous Blue and Green do just that in Amity Home's new collection.

Limestone and Steel Blue represent dusty blue hues, Laurel and Cypress bend green slightly hazy, and right in the middle is Sea Glass and Mineral. Each hue has several solid texture options from starting pricing points to luscious velvets to cozy knits. Statements are made with florals and vacation-inspired stripes

Pair any of these calming colors with neutrals, pop them with a warm tones for a dynamic effect; or create a truly serene palette by simply layering two of these tones together.
