Original Hand-Gilded Textiles Create Exquisite Customizable Wall Decor for Residential or Commercial Spaces

Virginia Beach, VA: It's innovative. It's fresh. It's exciting. Most of all, it is beautiful. Welcome to the r. LUSK line of hand-gilded textiles, a to-the-trade original and completely customizable wall décor solution for residential or commercial interiors.

Each panel begins with the rich custom pigments developed by artist/owner Reese Lusk. His original patterns are then applied and gilded by hand in gold or silver leaf. Painstakingly sealed and mounted on a linen-wrapped panel, each is beautifully framed in a five-sided acrylic vitrine. A wooden frame from Larson Juhl is also available.

While many of the patterns in the textiles are inspired by centuries-old designs originating from travels to Europe, Greece, the Middle East and North Africa, others are from the artist's own imagination. The results are iconic cultural and contemporary designs that give these lovely hand-gilded panels the appearance of a textile found on an exotic journey.

Lusk was fresh out college with a bachelor's degree in fine art and art history when he landed his first job to paint a Williamsburg inspired scenic mural for a residential designer in Virginia. The designer and the client were so pleased Lusk knew he had potentially found a way to make a living from his talents as an artist. He opened r. LUSK Studios in 2007. It didn't take long for architects and interior designers to discover it as a creative resource for innovative architectural finishes and decorative arts from custom painted furnishings, mirrored glass, art and more.

The beautiful hand-gilded textile panels are now at the center of the company's creativity. The idea evolved from an art solution for a commercial client to the beautiful, sophisticated, and elegant customizable product it is today.
