About DEDON

DEDON has been revolutionizing outdoor living for over 30 years. Full of innovative and pioneering spirit, curious by nature and driven by a passion for good design, DEDON is always on the lookout for new adventures, encounters and sources of inspiration.

It all started with a fiber that was developed in a family business. From the development of the groundbreaking DEDON Fiber to the creation of hand-woven pieces that have become timeless design icons, DEDON's journey reflects an unwavering commitment to enabling people around the world to enjoy more of life's precious moments together under the open skies.

This year's new products embody the essence of DEDON's DNA and illustrate the company's continuous pursuit of innovation and craftsmanship. New weave patterns add a new dimension to the portfolio, while the introduction of a new fiber technology revolutionizes the industry once again.

DEDON FIBER: A proud heritage constantly finding new expression

Delightful to touch, durable against the elements, DEDON Fiber sparked a revolution in outdoor living that continues to this day. Produced at our state-of-the-art facilities in Germany, DEDON Fiber takes numerous profiles and textures, each innovated by fiber specialists and designers working in close collaboration. Their creations are then sent to our zero-waste facilities on Cebu Island, Philippines, where master artisans weave them by hand into our award-winning collections. Though it finds expression in many forms and colors, DEDON Fiber is unmistakable for its quality, beauty, refinement and hardiness.

MYSTIQUE FIBER

With 'Mystique Fiber', DEDON Studio has redefined what is possible in the realm of fiber. The material possesses a 3D effect, created using a new technique that wraps two boldly contrasting colors together, resulting in a variegated, dynamic surface that shifts depending on the viewing angle. This innovative fiber is the first of its kind, marking history and setting a new standard for the industry. 'Mystique Fiber' is featured in our classic ORBIT and LOUNGE collections, infusing both with newfound elegance while expanding the configuration opportunities of these timeless classics.

LOUNGE

Design by Frank Ligthart

When designing LOUNGE twenty years ago, Ligthart was inspired by the challenge of creating the world's first truly modular outdoor system. Influenced by minimalist principles, the designer opted for austere simplicity. LOUNGE, one of DEDON's first collections, is today as simple, striking and versatile as ever. Although it has been expanded over time, it remains true to its original premise: less is more.

ORBIT XXL

Design by Richard Frinier

The *original* outdoor icon

ORBIT is the original icon of outdoor furniture design. The new typology of loveseat was a sensation from the moment it launched. 20 years on, Richard Frinier's multiple-award winning collaboration with DEDON continues to delight, surprise and inspire with its novel design, precision-opening canopy and promise of extraordinary comfort. No wonder people want to get in immediately. In 2024, the icon appears in new splendor, woven from the new Mystique Bleu fiber.

CIRQL NU

Design by Werner Aisslinger

Innovative
yet *archetypal*

CIRQL NU

Design by Werner Aisslinger

Overview

Created using DEDON's groundbreaking Invert Fiber, CIRQL NU signifies the next evolution of the collection and the brand's DNA. Werner Aisslinger's latest collection is made using co-extrusion, a process that combines two distinct fiber colors and types into one strand. The result: stunning colorways, diverse textures and geometric patterns with a special 3D-effect, creating an almost iridescent sheen depending on the viewing angle. Lightweight and semi-transparent, innovative yet archetypal, CIRQL NU is sure to become a beloved companion across outdoor and indoor worlds.

Invert Fiber

The 'Invert Fiber' takes DEDON DNA into a new era, in which 3D visuals merge with ancient handcraft. Developed specifically for our CIRQL NU collection, 'Invert Fiber' is a bicolor fiber comprising of complementary tones. With a cross-section that resembles a decreasing crescent, the fiber eloquently expresses DEDON's deep connection with the elements at the smallest level. What sets 'Invert Fiber' apart is its co-extrusion process, which allows the upper half to consist of a softer feeling touch fiber, while the bottom retains characteristic DEDON tactility. The result is a design that is not only pleasurable to feel but also visually stunning, with the dual colorway adding depth and dimension to CIRQL NU.

Inspiration

Werner Aisslinger's inventiveness and far-reaching influences find stunning expression in CIRQL NU. *"I always loved the simple shapes and at the same time the sophisticated weaving of African outdoor chairs,"* says Aisslinger, *"especially the round ones which are traditionally woven around barrel oil drums as a basic form."* The German designer sought to explore his deep fascination with African craftsmanship through DEDON's cutting-edge technology.

Quotations

"This mélange led us to the concept for the CIRQL NU – rounded, welcoming shapes combined with a new, radiant weaving pattern and color combinations, supported by DEDON's high-tech production of lightweight frames and joints. The result is splendid," he adds.

PAPYON

Design by Arnd Küchel

Beauty, grace
and *efficiency*

PAPYON

Design by Arnd Küchel

A balance of
functionality
and *design*

Overview

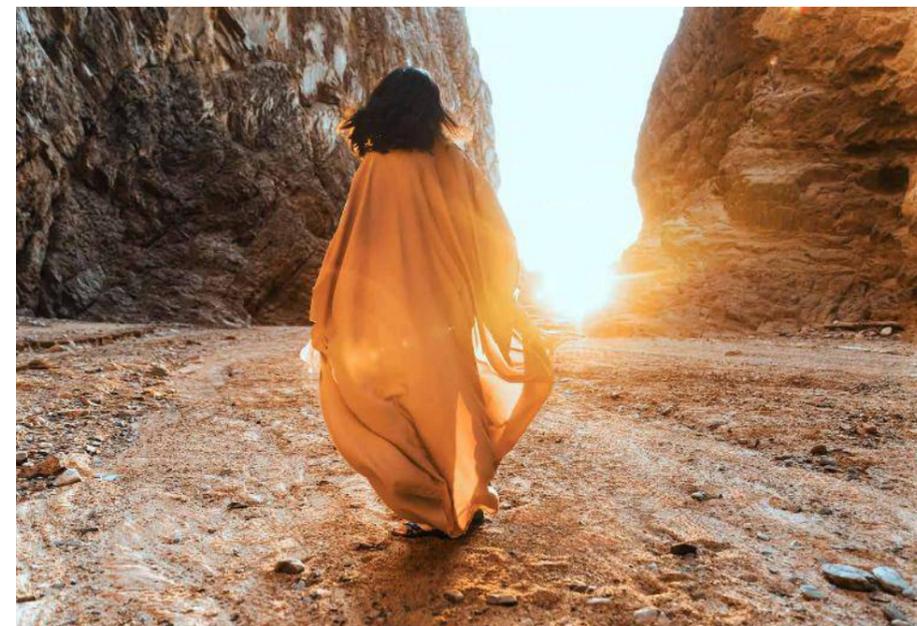

Like the butterfly that inspired its design, the new PAPYON collection by Arnd Küchel is a delightful union of beauty, grace and pleasure. The uniquely designed Wing chair and accompanying Footstool are created using distinct weaving textures, combined with an innovative technique. In nature, harmony is created through contrasts, and PAPYON's colorway elegantly encapsulates this truth: ‚nectar‘ combines warm reds and oranges. The result is a collection that represents the next metamorphosis of DEDON Fibers and craftsmanship.

Inspiration

In conceiving PAPYON, Swiss designer and architect Arnd Küchel searched for examples of nature's pattern making and elegant practicality. The lightweight, flexible and aesthetic wing of a butterfly inspired the first sketches of PAPYON, and Küchel was quick to note the similarities between these organic formations and DEDON Fiber. Eager to express this connection in a novel way, Arnd Küchel worked with DEDON's master weavers to imagine a collection emblematic of a butterfly, both in its structure and its form.

Quotations

“The simplicity of nature is always my first stimulus. For PAPYON, it was the shape and the lightweight, filigree-like structure of a butterfly that inspired me.” — Arnd Küchel

KIDA

Design by Stephen Burks

*Irresistible
lightness and
generous flair*

KIDA

Design by Stephen Burks

New dimension of freedom

Overview

With KIDA, Stephen Burks has conceived a collection as delightful to behold as to experience. DEDON's first collection wrapped — rather than woven — in DEDON Fiber, KIDA features a cradle-like organic form that's open, airy, and inviting. Continuing the success story of the KIDA hanging lounge chair, the new KIDA armchair elevates the collection to new heights. Unveiled in three striped colorways, the 2024 additions pair harmoniously with existing KIDA hues. Perfectly suited to an array of ambiances, from coastal villas to woodland retreats, KIDA evokes an irresistible lightness and generous flair that invites users alone or in company to savor the moment.

Inspiration

Drawing inspiration from his close collaboration with DEDON's master weavers in the Philippines, Stephen Burks developed a design that looks and feels less enclosed. *"The magic of being in the factory and challenging everybody to find unfamiliar ways of doing things that give a fresh and uniquely DEDON feeling to the collection is always my mission,"* Burks says.

Quotations

"KIDA is about expressiveness and innovation. The use of wrapped fiber to 'paint' the collection graphically makes it distinctly attractive and distinctly DEDON. I see color as a material and DEDON fiber is the most flexible expression of that metaphor. Strong, textured, and adding both color and protection, it's an ideal material." — Stephen Burks

"I've always thought of KIDA as a collection, a family of products that invites extreme comfort, gatherings, and escape," says Burks. *"We wanted to find new ways we can bring people together."* To accommodate such active social participation, Burks was inspired to develop a design that looks and feels less closed while maintaining the airiness of KIDA: *"I asked myself: How do you express the feeling of floating in furniture? How can the frame be both supportive and open?"*

SCOORA

Design by Hoffmann & Kahleyss Design

Outstanding
craftsmanship &
refined design

SCOORA

Design by Hoffmann & Kahleyss Design

Overview

DEDON introduces SCOORA by Hoffmann & Kahleyss Design, a refined yet playful Lantern that brings craftsmanship and design to the outdoors. The collection name SCOORA is a variation of the name Zora, which in different languages and cultures has meanings such as sky, sun, sunrise or shell. Turned to the sky, the Lantern resembles an open shell and creates a soothing, atmospheric light. Wrapped in an organic silhouette and an intricate weave that comes in two colorways, this vibrantly textured lighting collection adds a unique ambience to any setting.

Inspiration & Quotations

Developed by Hamburg-based Hoffmann & Kahleyss Design, SCOORA “unifies motifs found in nature and dramatic, gestural forms to create a splendid lighting experience,” explains co-founder Birgit Hoffmann. Elaborating on how SCOORA embodies the holistic spirit of DEDON, she states, “We wanted to inspire a sense of comfort and refuge with SCOORA’s large format ... our focus on this project has been on unlocking the potential of different weaves, on finding a natural design language which strikes harmony with the outdoors.”

“We were constantly surprised by the sheer skill and versatility of DEDON’s master weavers, and I really think that level of passion and precision which our team worked with shows in the product,” says Christoph Kahleyss, co-founder of Hoffmann & Kahleyss Design.

“SCOORA is just at home on a garden patio as it would on a spacious hotel terrace. The collection provides the right ambience for when you want to gather with friends for dinner, drinks or dancing in the evening.”

OMBII

Design by DEDON Studio

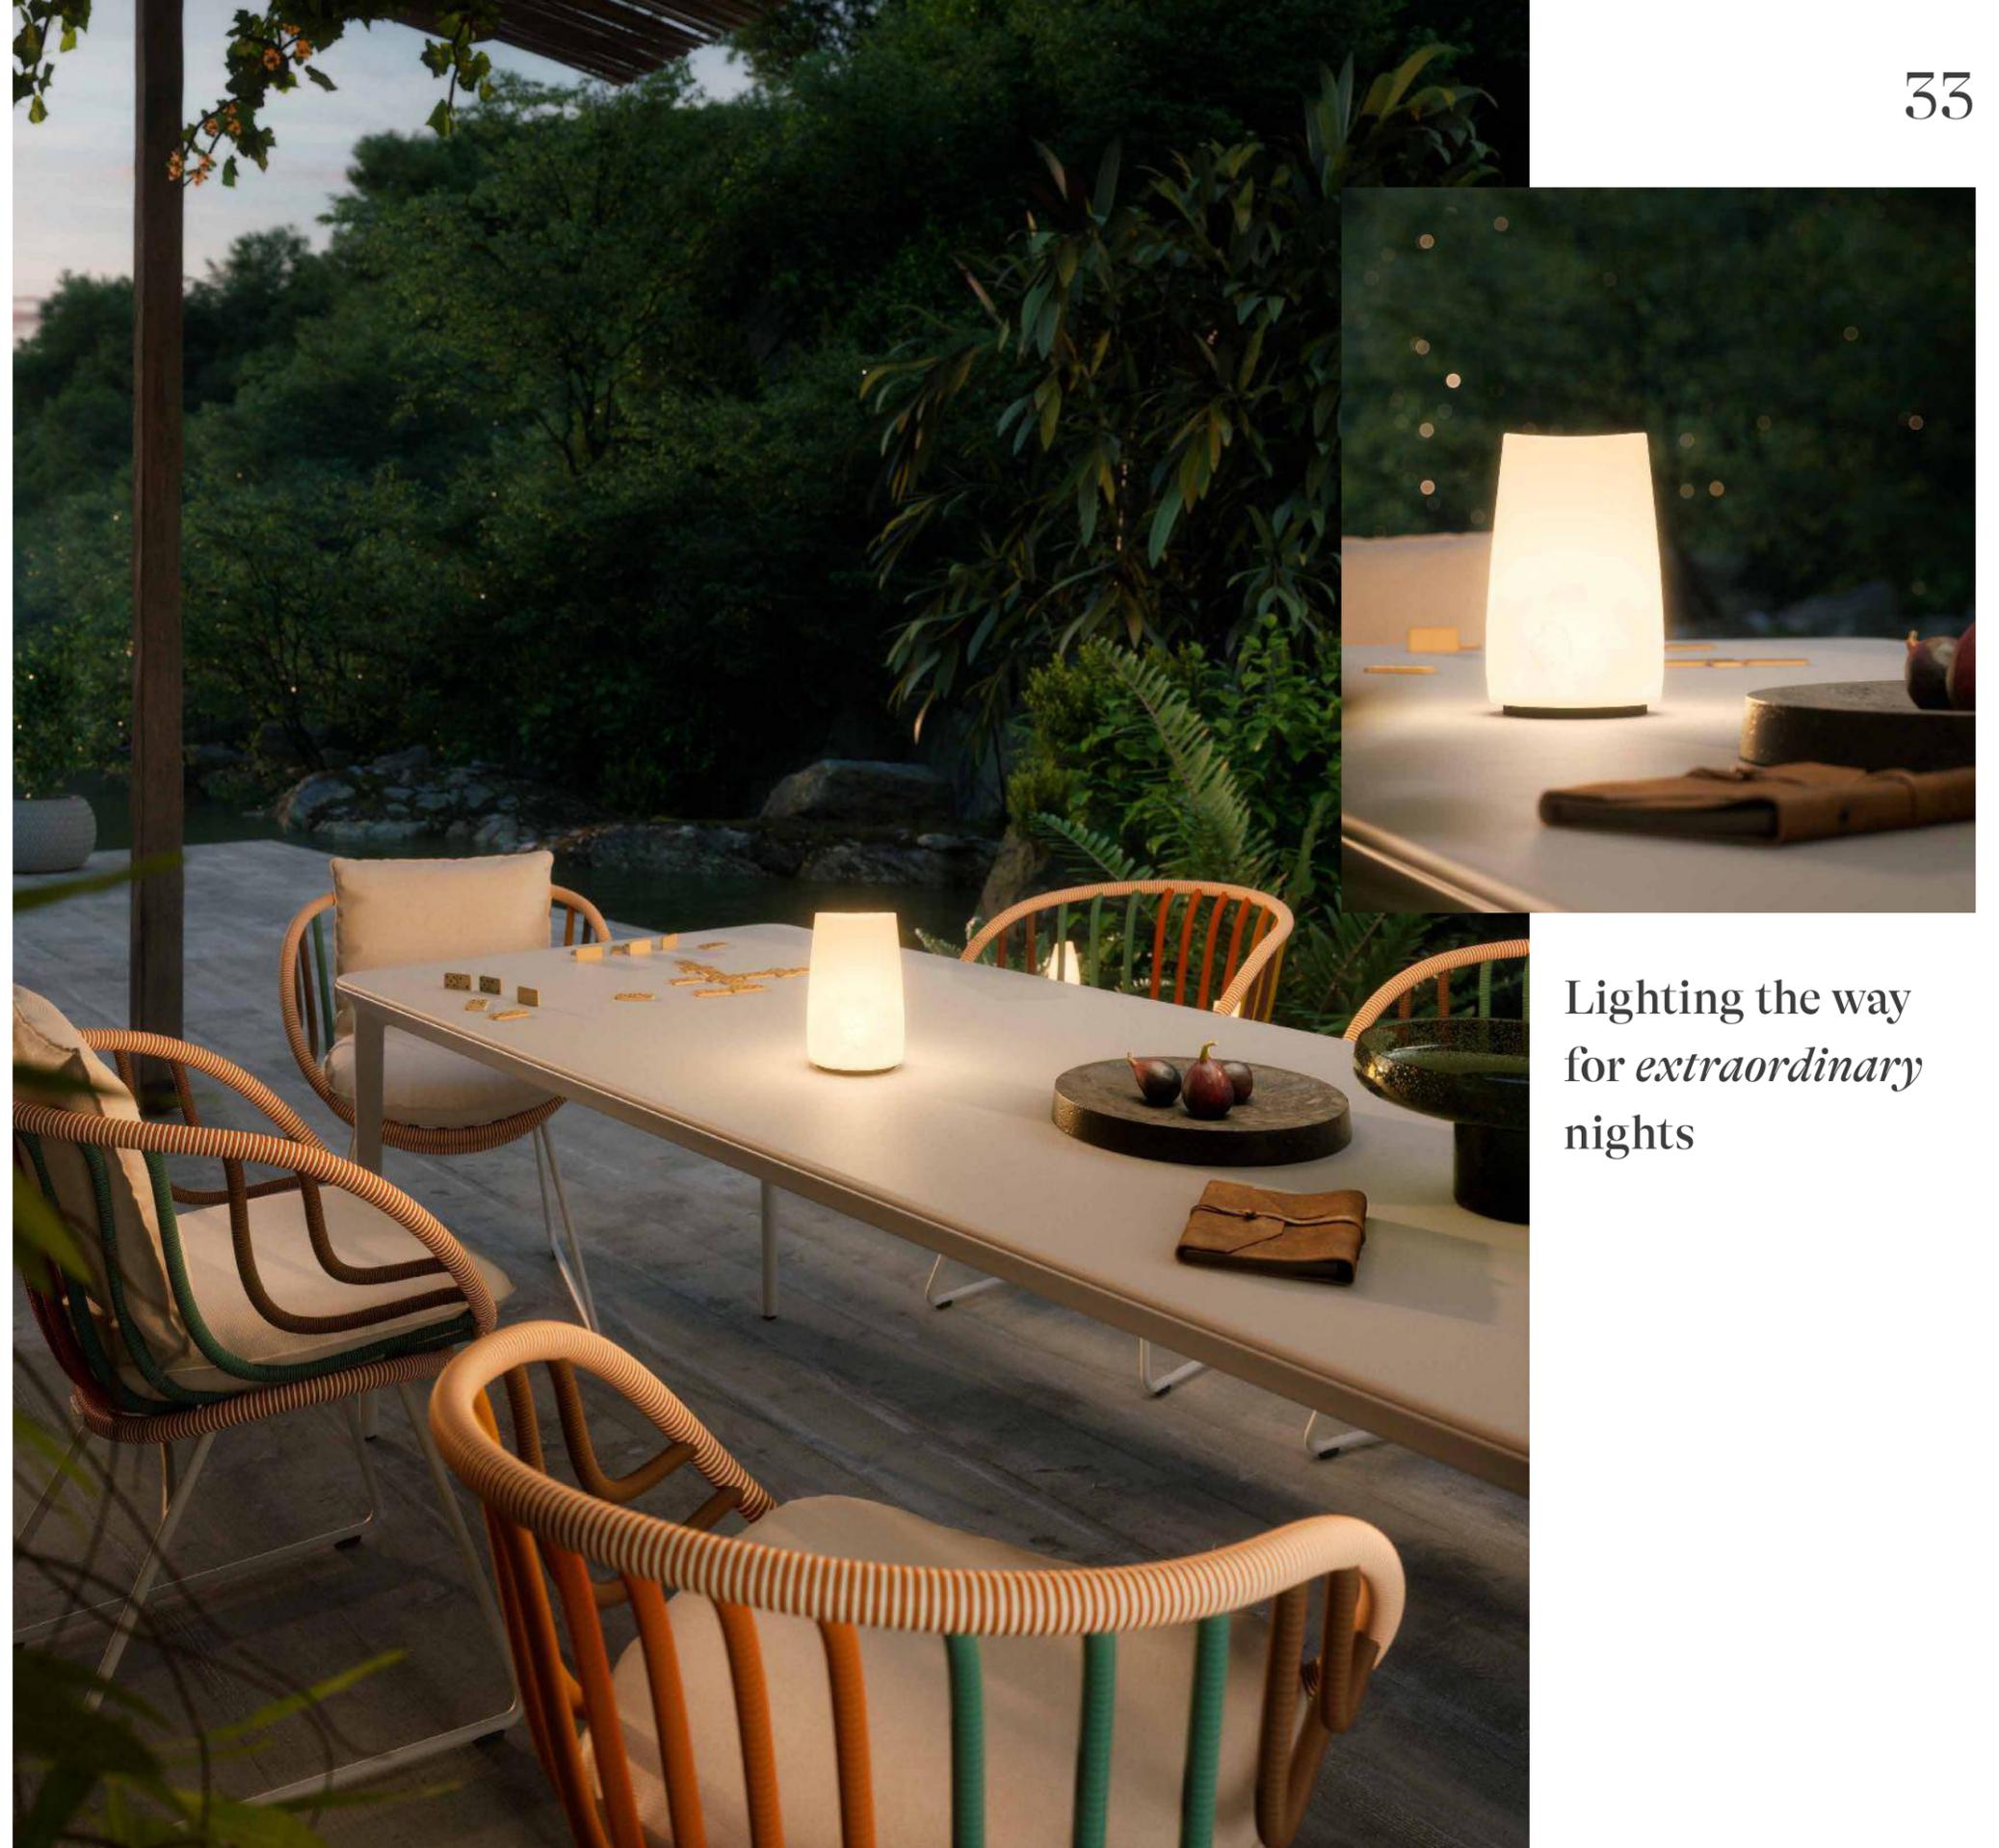

Overview

OMBII combines nature-inspired design with long-lasting manufacture. DEDON Studio's first in-house designed lamp is a charming allrounder that brings warmth and character wherever it goes, whether glowing on its own or inside other collections such as SCOORA Lanterns. OMBII's organic shape is rotationally molded from weather-resistant PE and has an exceptionally soft surface that glows in a soothing ambience.

Quotations

"Light is intrinsically connected to feelings of well-being, warmth and conviviality. In OMBII, we sought to capture those feelings in a new object that felt characteristically DEDON." — DEDON Studio

LEAF

Design by Frank Ligthart

Soothing,
intuitive and
familiar

Overview

A success upon its release over 15 years ago, LEAF has grown into a new synthesis of shape, color and materials. Frank Ligthart's Beach chair is now wider and more ergonomic than before; expressing the promise of its name with newfound function and elegance. Softly curved lines create a soothing, natural shape that gently embraces the body and stirs the soul. Because what could be more inspiring than nature herself?

Characteristics

Ligthart brings newfound convenience and function to the graceful contours of this DEDON classic. Standing on four stationary points, the smooth, concave body of LEAF has been widened and reshaped to be even more ergonomic than before. The new edition of the beach chair is available with a seamlessly adjustable backrest via gas springs.

Quotations

"When I'm designing furniture for the outdoors, my first source of inspiration is always nature itself. I ask myself which shapes are soothing, intuitive and familiar — and how my own designs can reflect these aspects in a simple and intuitive manner. After all, nature's great beauty lies in its simplicity." — Frank Ligthart

SWINGREST

Design by Daniel Pouzet

Natural iconic &
harmonious

Embracing *purity & simplicity*

Overview

Though it shares part of its name and most of its structure with DEDON's iconic NESTREST hanging lounger, the new SWINGREST by Daniel Pouzet is in a class all its own. Borrowing the basket-like bottom from his earlier creation, the NESTREST, he has managed to create an altogether new work that feels even more spacious while seeming to take up less space.

SWINGREST is now available in 'olive,' a new strand of DEDON Fiber 'touch'. Drawing inspiration from the olive fruit, long celebrated for its beauty, the new fiber has a matte surface and muted green hue hinting at leafy foliage, growth and renewal.

BELLMONDE

Design by Henrik Pedersen

An elegant,
contemporary
sense of life

Overview

Easy elegance meets contemporary ease in BELLMONDE by Henrik Pedersen. Designed to encourage relaxation, this warm and welcoming collection is characterized by soft organic forms and an innovative new textured weave. New Armchairs and Lounge chairs join the versatile BELLMONDE table to form a larger ensemble that's ideal for bringing people together for dining, conversing or simply lounging in style, whether by sunshine or starlight.

The BELLMONDE armchairs and lounge chairs are now available in two colorways: 'pine', a mélange-like multicolor fiber weave that evokes a forest illuminated by rays of sun and 'summit' which gives BELLMONDE luminous, sun-dappled allure through the stunning blend of three light tones.

ROI

Design by Benjamin Baum

Lightweight,
dynamic and
adaptable

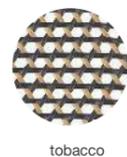

Overview
ROI by Benjamin Baum is a contemporary expression of pure DEDON DNA. This fully woven collection encompasses side chairs, armchairs and a comfortable lounge chair, combined in two distinct weaving styles and an eye-catching mix of colors, textures and patterns. Compact yet comfortable, ROI is equally at home atop a beach dune, on an urban balcony, or poolside amidst a full array of DEDON furniture. Lightweight, stackable and easy to move around, ROI is there when you need, bringing people together for conversations all day long and deep into the night.

The collection will be available from 2024 in the friendly light colorway 'silica' and the already familiar dark and warm 'tobacco'.

SATELLITE

Design by Jean-Marie Massaud

Distinctive,
elegant and pure

Overview

Elegantly simple, streamlined and modern, the SATELLITE tables bear all the hallmarks of their designer, Jean Marie-Massaud. And with tabletops of scratch-resistant, moisture-resistant HPL and bases made from an innovative, frost-proof ceramic, the collection is as practical and durable as it is pleasing to the eye.

Coffee table, Dining table, Counter Height table, and Bar Height table are four new table options for 2024. With varying heights and sizes, they offer exceptional flexibility and diverse opportunities for stylish dining and lounging.

PAROS

Design by Jean-Marie Massaud

Rustic yet *refined*,
timeless yet *modern*

Overview

PAROS by Jean-Marie Massaud is classic DEDON with a contemporary twist. The generous proportions, grounded presence, and luxurious comfort of this woven modular lounge system hail back to the early successes of the DEDON brand. In 2024, the new addition of a Beach chair will complement the collection. Crafted for sun-drenched relaxation, it captivates with its low horizontal volumes and feet in a choice of polished stainless steel or powder-coated aluminum. PAROS is in a class of its own with its carefully engineered DEDON Fiber strand, exhibiting a strikingly authentic and organic appearance. Rustic yet refined, timeless yet modern, this is the outdoor collection that blends seamlessly into any landscape, welcoming friends and family for generations to come.
