

Platinum Décor

Platinum Décor features pieces of modern design, which incorporate curvature, color and texture such that when placed in a contemporary home, a warm and inviting environment emerges.

Today the current trends involve the merging of classic, proven furniture-making practices being combined with emerging technologies and new green materials and green manufacturing techniques. The most interesting design aspects of the developing trends to Platinum are the use of new and unusual materials and textures in combination with some features that are more familiar.

The **Vetro Collection** can be made to compliment any style décor because of the way we are taking advantage of a new technology: high resolution digital printing on glass. With this technology, each piece becomes a blank slate for creating amazing interiors from digitally enlarged and enhanced natural materials like Granite, Agate of Mother of Pearl, to something more unexpected - really anything you can imagine. Since the image is printed directly onto the back of the glass so that you see the image through the glass, the surface is flawless and perfect, but the aesthetic of aged wood plaster relief or other three dimensional or textured materials take on an elegance and refinement that can't be achieved in the natural materials themselves.

Platinum Décor
