

RENDEZ-VOUS WITH ALESSANDRO MENDINI

The new seating-system found its home

The seating-system by **Sergio Bicego** is artfully brought to life through the glossy pages of issue 3 of **S'—Magazine**. In the belief that furniture and context only really function when working together, **Saba** steps into the eccentric world of architect designer **Alessandro Mendini**, setting up a playful and intimate *rendez-vous* between the new sofa-system and the beautiful Milanese residence which enhances its nature.

In a whimsical journey of discovery from one colourful room to the other, **Rendez-Vous** reveals itself as a flexible design perfectly at ease both in residential and public spaces. Only composed of a few elements, it allows the user to adjust it accordingly to the needs, playing with the soft upholstery components fixed on the elegant black painted structure.

The pure, sensual lines of Saba's design gently blend with the vibrant, cocooning interiors of Mendini, through a powerful storytelling made of velvety surfaces, pastelled-hued walls, curvilinear shapes and mid-century touches.

The two personalities meet and the result is enchanting: an alluring invite to have a seated encounter with aesthetic pleasure.
