## **Casabianca Home Unveils Sensational Collection of Motorized Dining Tables at October High Point Market**

Casabianca Home, the iconic manufacturer of innovative contemporary home furnishings, introduces a collection of motorized tables at the High Point Furniture Market 2019. These remarkable dining tables, available in multiple styles, offer the best the market has to offer in design and technology.

“We couldn’t be more excited about this fantastic new addition to the Casabianca Collection,” says Isaac Hadida, Casabianca’s CEO. “What sets it apart is a patent-pending motorized mechanism that fits inside the tables, keeping the modern and elegant look while blending state-of-the-art innovation and design. Its maintenance-free, smooth operating system extends to perfection, making it different and better than anything else on the market today.”

The state-of-the-art tables are constructed with the highest quality, longest-lasting components available: marine-grade stainless steel, aluminum tracks for easy gliding, stain-resistant Italian porcelain and extra-durable tempered glass.

The ingeniously designed tables are operated with the simple push of a button, located on the table frame or on a sleek remote control which provides wireless power. Constructed with safety in mind, each table is outfitted with a set of keys to prevent it from operating, creating a safe environment for children and pets.

Elegantly designed, sophisticated yet functional, and made using the best technology in the world, the collection offers multiple choices for every aesthetic. The tops are available in scratch-resistance Italian porcelain, clear, colored and smoked glass. The stylish, clean-lined bases come in stainless-steel, white lacquer dark gray oak, and walnut veneer. Come see for yourself this unique and innovative addition to the furniture market.
