

## COVERED FLOOR TO CEILING

In 2020, Amity Home launched their line of exclusive area rugs and in so doing, covered every plain of the bedroom from floor to ceiling. “It was a natural next step for the line” President Ben Chhabra says. It is indeed, literally, the next step one takes while tearing themselves out of a luxurious bed each morning. As is the case with Amity Home’s bedding and curtain line, their rugs are hand crafted of natural materials.

With a focus on neutral textures, intentional pops of color and fresh patterns, these area rugs are designed to align perfectly with Amity Home’s existing bedding line, but they are certainly not limited to the bedroom. “Our curtains, accent pillows and throws have long been used in non-bedroom applications” Chhabra continues, “and we are finding designers and retailers alike are specifying our rugs anywhere they have a floor to cover and areas to define.”

From gauzy linens to textured stripes; luscious velvet and luxurious silk the Amity Home curtain program has nearly every style covered. Choose from over 60 stocked styles or add custom options including lining, length and top style.
