**FOR IMMEDIATE RELEASE**

## BDI Introduces Free-Standing Mirror Design in Fresh Finishes

*Intro Adds Reflective Design for Various Spaces*

CHANTILLY, Va. — Oct. 12, 2022 — **BDI**, a premiere furniture designer and manufacturer of office, bedroom, storage and entertainment solutions, is introducing a new free-standing mirror design that offers reflection points for any space in the home. This new mirror will debut in BDI's High Point showroom, IHFC D724.

The Continuum Mirror by BDI is a full-length mirror that floats within the solid hardwood beveled perimeter, giving you a new dimension to reflect on. The mirror tilts up or down on its axis point, ensuring you always look your best from head to toe, and also spins a full 360° on its sturdy base, giving you the best vantage point from any direction. The hardwood frame is available in an Ebonized Ash or Natural Walnut finish.

As a complementary design for BDI's newly launched **bedroom collection, LINQ**, Continuum also beautifully coordinates with many of the designs in BDI's home office and entertainment collections.

“The Continuum Mirror was my first design with BDI many years ago,” said Matthew Weatherly, Associate Design Director for BDI. “As we have entered the bedroom category, we have revisited this popular design and modernized the aesthetic with new finishes and enhanced features.”

Continuum is now shipping and will be available at retail stores this fall. [Click here for high resolution images of Continuum.](#)
