BDI Debuts Popular Table Designs in Fresh Finishes

Dino Tables Offer an Organic Solution for Non-Rectilinear Spaces

CHANTILLY, Va. — Oct. 12, 2022 — **BDI**, a premiere furniture designer and manufacturer of office, bedroom, storage and entertainment solutions, is relaunching its popular table collection in new finishes for the High Point Market. The Dino tables, available in three sizes, will showcase in BDI's showroom, IHFC D724.

Designed by Louis A. Lara, the Dino tables are distinguished by their contoured edges, sleek brushed carbon legs and a new finish assortment to bring a modern appeal to this popular mid-century modern table design. Dino features a soft, triangular design that is punctuated with a grey-tinted tempered glass top surface. The brushed metal legs offer a sculpturally angular design that secures the top surface and incorporates a floating lower display shelf into the design.

Available in three sizes, the Dino collection includes:

- Dino Large Coffee Table, measuring 15.5"H x 55"W x 33.5"D
- Dino Small Coffee Table, measuring 15.5"H x 44"W x 27"D
- Dino End Table, measuring 24"H x 22"W x 22"D

All models come standard with grey-tinted tempered glass, brushed carbon legs and floor protectors under the legs. The lower shelves are hardwood veneers available in an Ebonized Ash, Stone Grey or Natural Walnut finish.

“The Dino table is a popular choice for sectional sofas and unique spaces where a rectilinear table isn’t the answer,” said Lara. “Dino has been a popular collection for many years, and now BDI is bringing it to consumers in fresh finishes and an elegant, brushed carbon frame that makes it ideal for today’s mid-century modern spaces.”
